

ERA UNIVERSITY
DIPLOMA IN MRI TECHNICIAN
PROGRAM OUTCOME

1. Demonstrate the ability to operate MRI equipment efficiently and safely.
2. Understand and apply MRI scanning protocols and techniques to acquire high-quality diagnostic images.
3. Provide compassionate and effective patient care, including preparing patients for MRI procedures.
4. Implement radiation safety measures, even though MRI does not use ionizing radiation, including awareness of safety guidelines related to the strong magnetic field.
5. Identify and report any image artifacts or technical issues that may affect the diagnostic quality of the MRI.
